TO : Executive  
THRU : Chief of Administrative Staff  
Personnel Director  
Deputy Executive  
FROM : CIA Surgeon  
SUBJECT: Preventive Medicine Program

1. In accordance with Public Law No. 658 the Medical Division has established a Preventive Medicine Program for the Washington area.

2. The details of establishment of this program have recently been discussed with the Chief of Employees' Health Services of the United States Public Health Service and his representatives.

3. As a result of these discussions the Medical Division has been informed that the United States Public Health Service has no suggestions to make regarding policy or philosophy of the present program and that further consultations in the future are unnecessary.

4. Accordingly, it is recommended that that portion of the medical program as it applies to the Washington area should no longer be considered an interim program but should be designated as a Preventive Medicine Program and should be incorporated as such in final Central Intelligence Agency policy.

JOHN R. TIEREN, P. D.
